Swissquote

YOUR KEYS.
YOUR CONTROL.

The wallet Swissquote can recover,
but never spend.

swissquote-two.vercel.app

Swissquote

SELF-CUSTODY TODAY MEANS LEAVING SWISSQUOTE

Custodial

Not your keys

External wallet

24 words on paper.
Lose them, lose it all

Our wallet

Swissquote

YOU CAN STOP IT. THE OLD KEY IS DEAD

1 Cancel with one tap

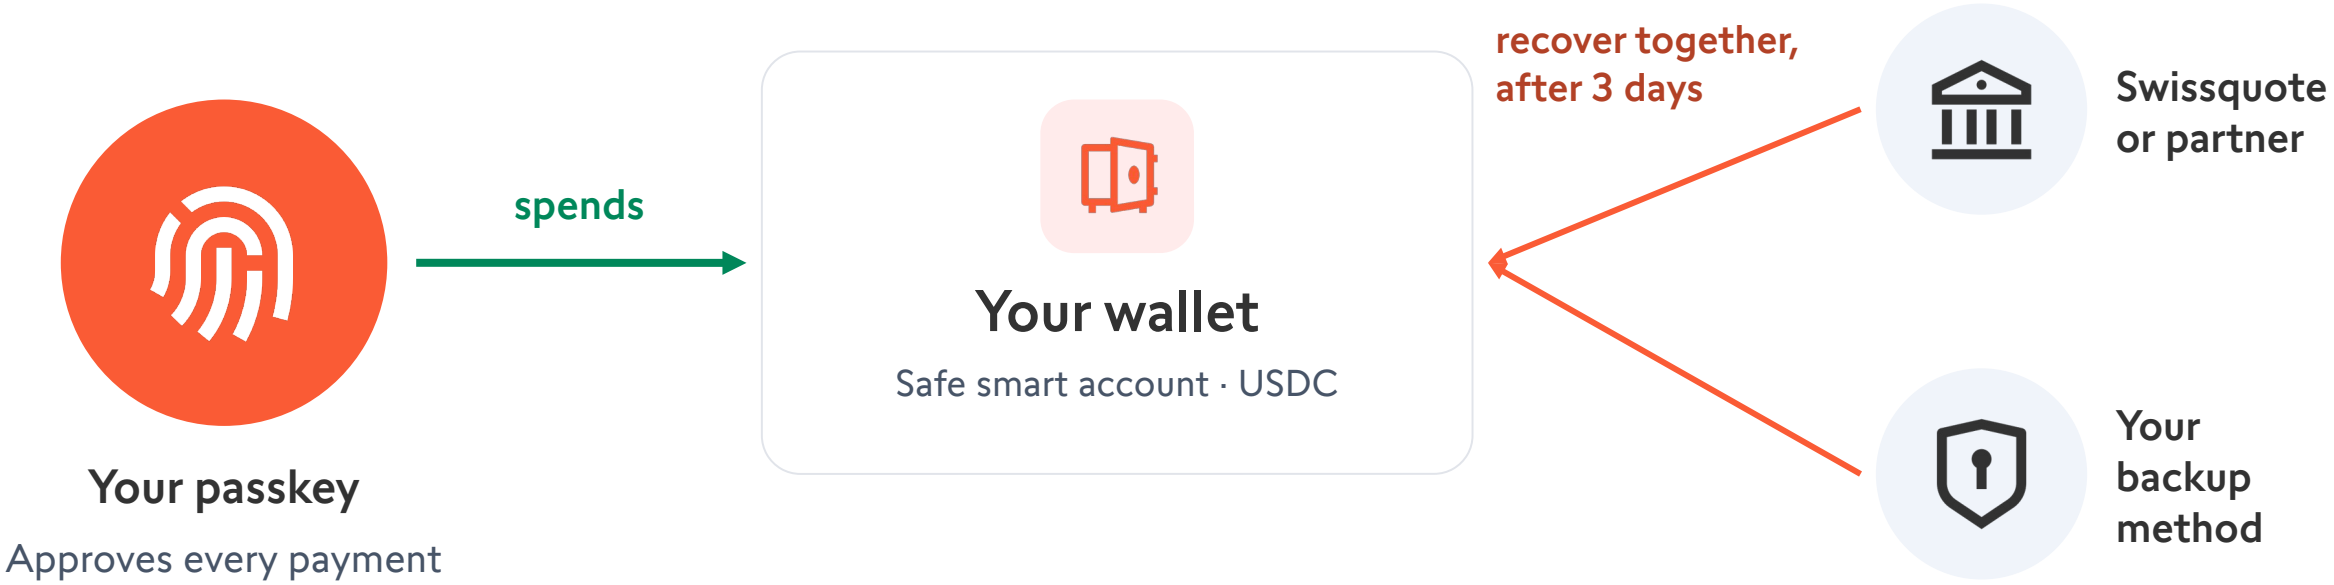

2 Old passkey rejected

Swissquote

ONLY YOUR PASSKEY CAN SPEND

Swissquote can help you recover

Swissquote can never spend

Swissquote

NOBODY ELSE CAN MOVE THE FUNDS

	SPEND	TAKE OVER
You	✓	✓
Swissquote	✗	✗
Swissquote + partner	✗	✗
Swissquote + your backup method	✗	⏱
Swissquote hacked	✗	✗
Thief with phone + e-mail	✗	✗

Clock: only after a 3-day delay that you can cancel

Swissquote

WHY WE BUILT IT THIS WAY

Passkey wallet

not MPC with a bank share

A bank key share would make it custody

Swissquote as guardian

not as co-signer

It can help recover, never spend

Two approvals, then a delay

not instant recovery

No one party alone; insiders get caught

Decline gas, never block

not a transaction filter

Blocking would be power of disposal

Your choice of backup

not a seed phrase

ID card, passphrase or another passkey

Partner beside Swissquote

not Swissquote alone

Recovery survives Swissquote disappearing

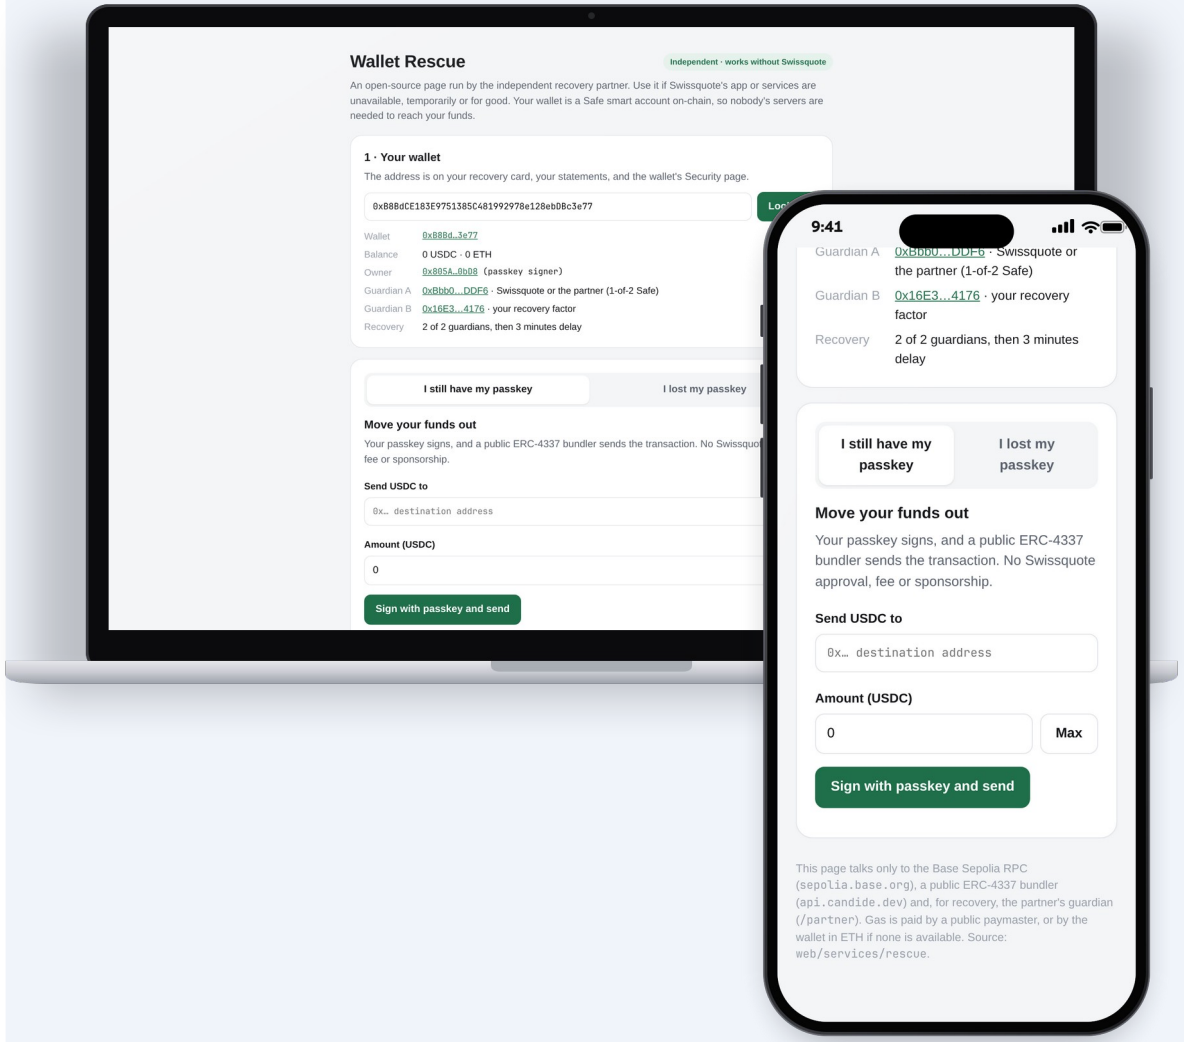

EXIT PATH

IF SWISSQUOTE DISAPPEARS, THE MONEY DOESN'T

Still have your passkey?
Send it out yourself

Lost it too?
Your backup method + the partner

No Swissquote server
Public RPC and bundler

BONUS · GASLESS AND COMPLIANT DAPPS

SWISSQUOTE PAYS GAS. IT DECLINES, NEVER BLOCKS

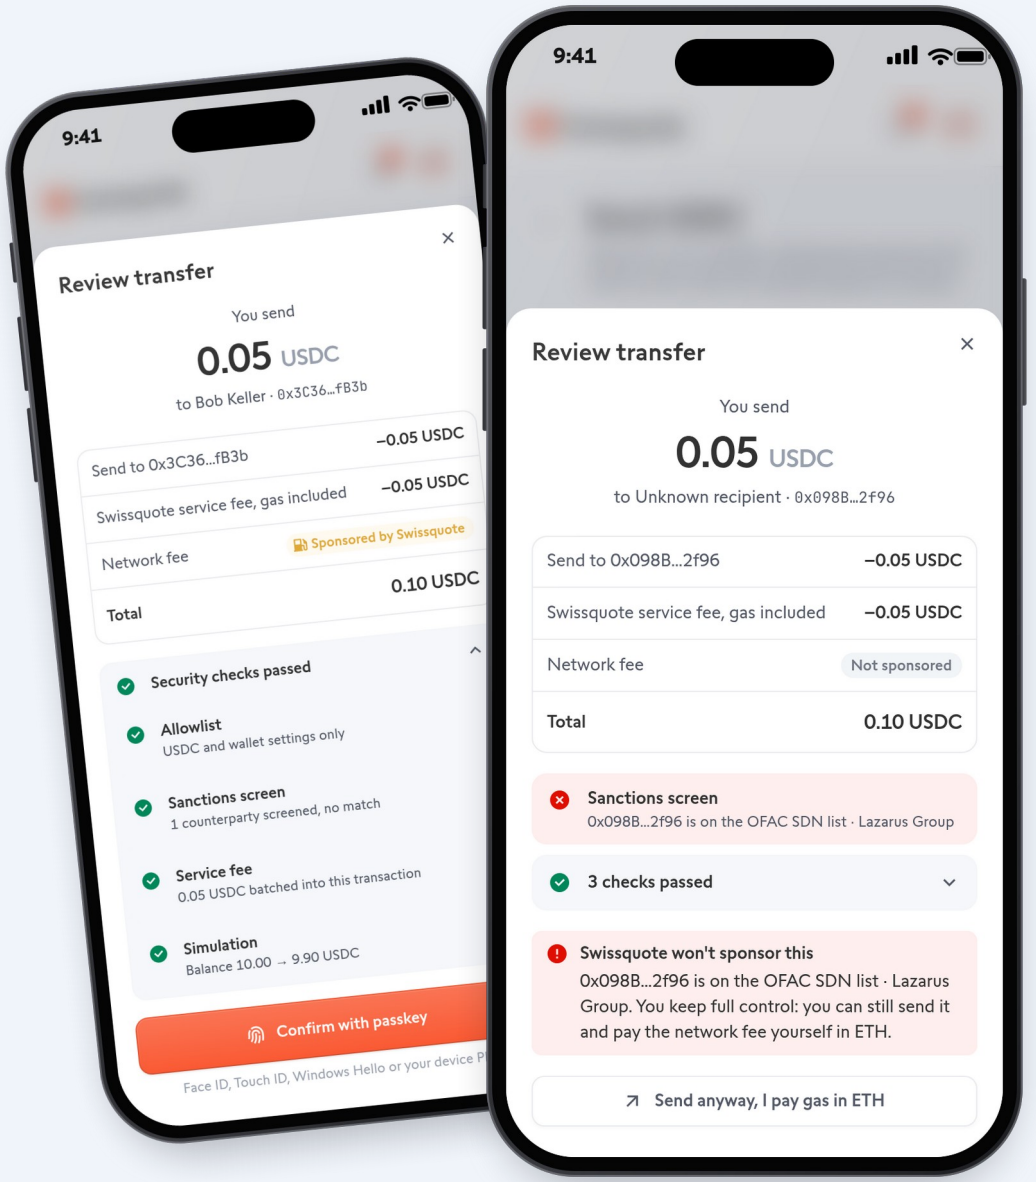

0 ETH

needed. Swissquote pays the gas,
0.05 USDC fee in the same transaction.

Sanctioned or drainer?
Swissquote declines to pay

Never blocked
Send anyway, pay your own gas

Swissquote

LEGAL FEASIBILITY

SOFTWARE, NOT CUSTODY

Swissquote can't sign

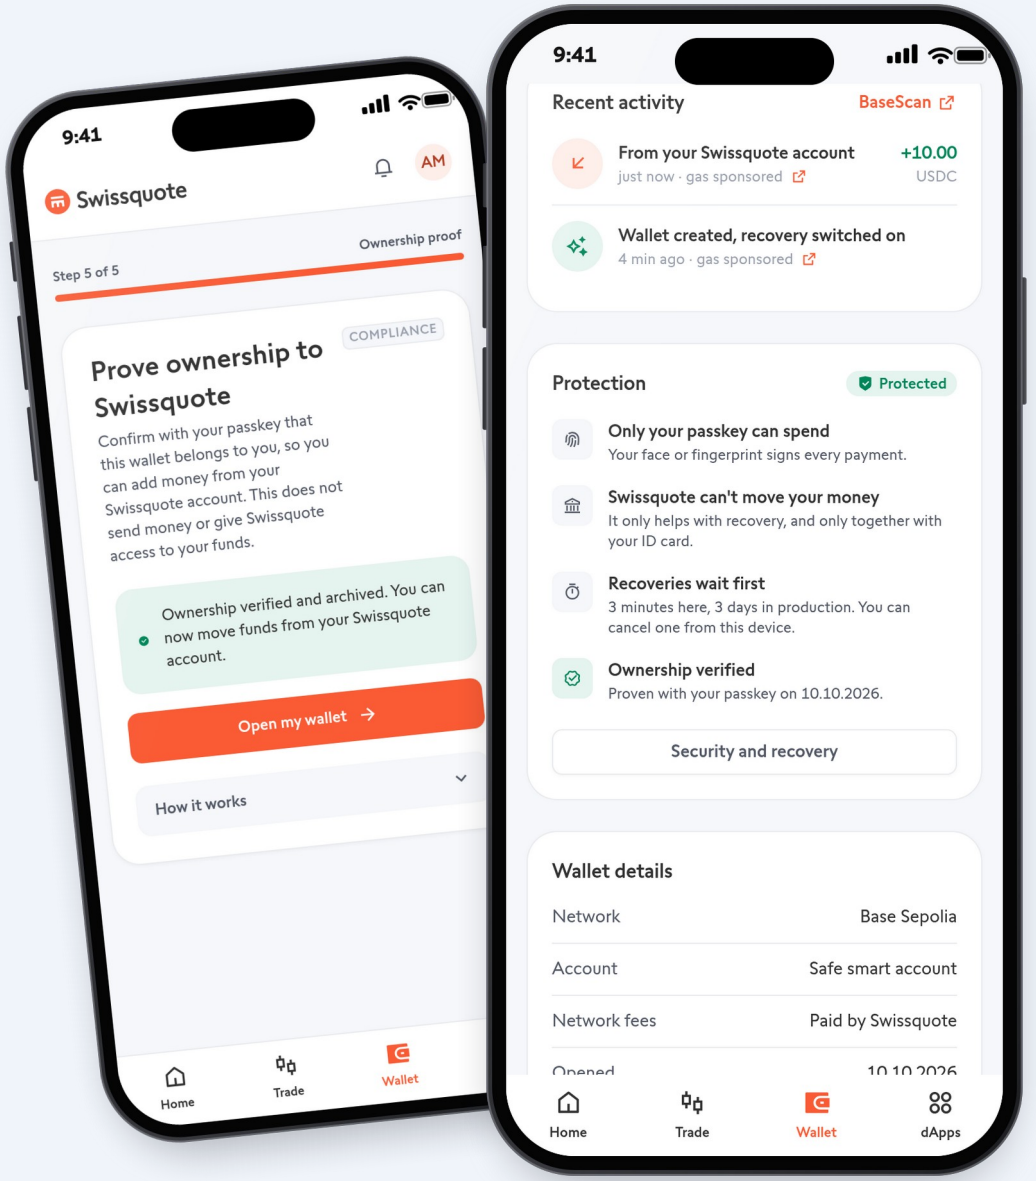

Can't recover alone
Not even with the partner

Can't block a payment

Travel Rule
Ownership proven automatically

Simplified reasoning, not legal advice.

Swissquote

Swissquote

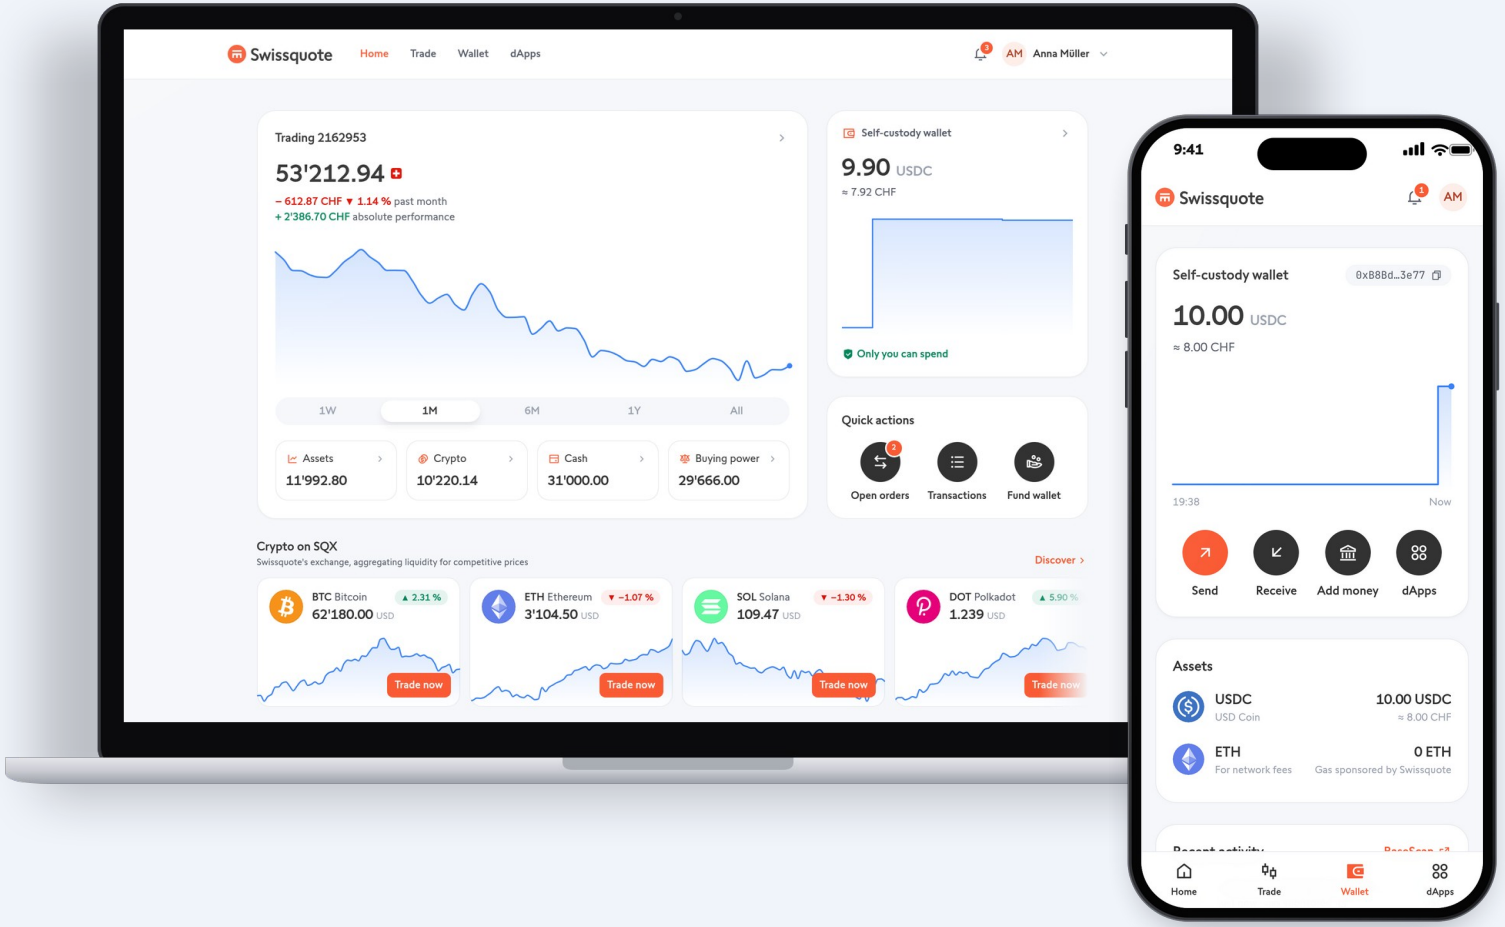

KEEP THE ASSETS. EARN ON ACTIVITY

Retention
Withdrawals stay next to trading

Fees
0.05 USDC per transfer

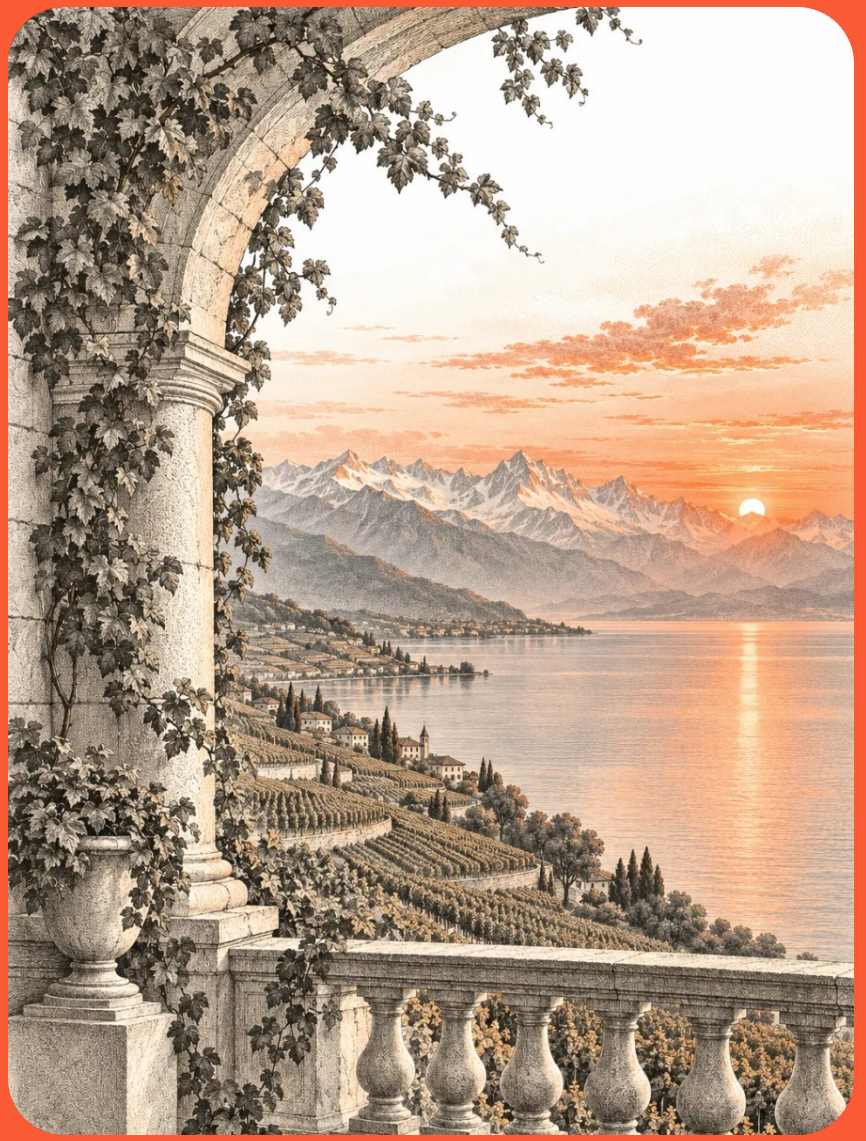

Trading
One tap back to SQX

Lower cost
No manual wallet checks

Swissquote

THE WALLET SWISSQUOTE CAN RECOVER, BUT NEVER SPEND.

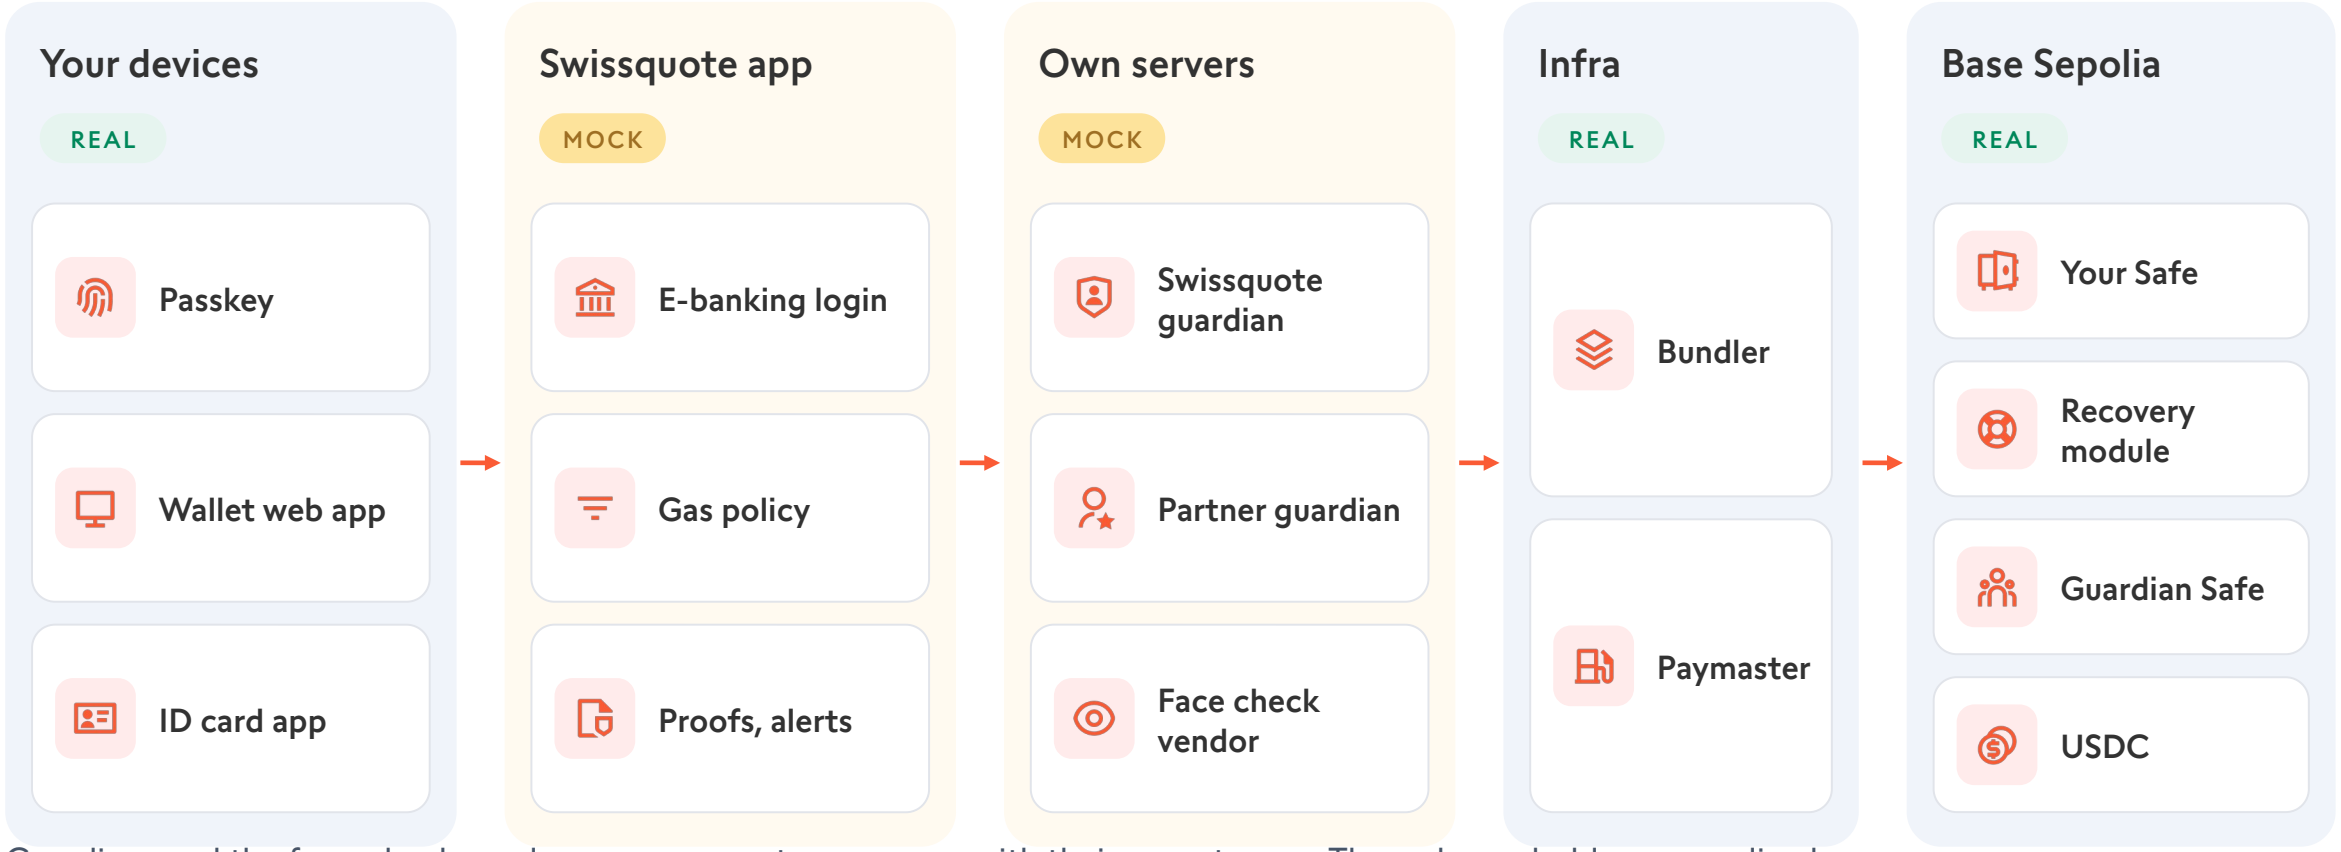

swissquote-two.vercel.app

Questions welcome

Swissquote

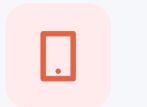

WHAT TALKS TO WHAT

Guardians and the face-check vendor run as separate processes with their own storage. The web app holds no guardian key.

Swissquote

WHO COULD STEAL, WHO COULD LOCK YOU OUT

Stolen phone

Passkey needs unlock

Phone + e-mail

Face check + factor

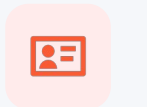

Swissquote hacked

Holds no spending key

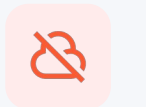

Swissquote + partner

Only one guardian vote

Insider + stolen ID

Stopped if you cancel

Swissquote gone

Rescue page + partner

Phone + its PIN

Residual: owner-level access

You lose everything

Locked out, by design

Swissquote

WHY NOT SEED PHRASE, MPC OR SHAMIR

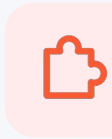

Seed phrase

Lose the paper, lose the funds

MPC, bank share

Bank co-signs everything: custody

Shamir split

Key rebuilt in one place

Passkey Safe

Key replaced, never rebuilt

EVM-only? What about Bitcoin? Wrapped BTC sits in the same Safe today. Native BTC next: a Taproot vault, your key spends, guardians only after a timelock.

Swissquote

TWO KEYS REPLACE THE OWNER. YOU ALWAYS HOLD ONE

GUARDIAN A

Swissquote or partner
After a live face check

+

GUARDIAN B

Your backup method
ID card, passphrase or another passkey

→

3-day delay
Alerts. One tap to cancel

New passkey owns it
Same address. Old key dead

About 5 minutes of client effort, then the delay. Never one party alone.

Swissquote

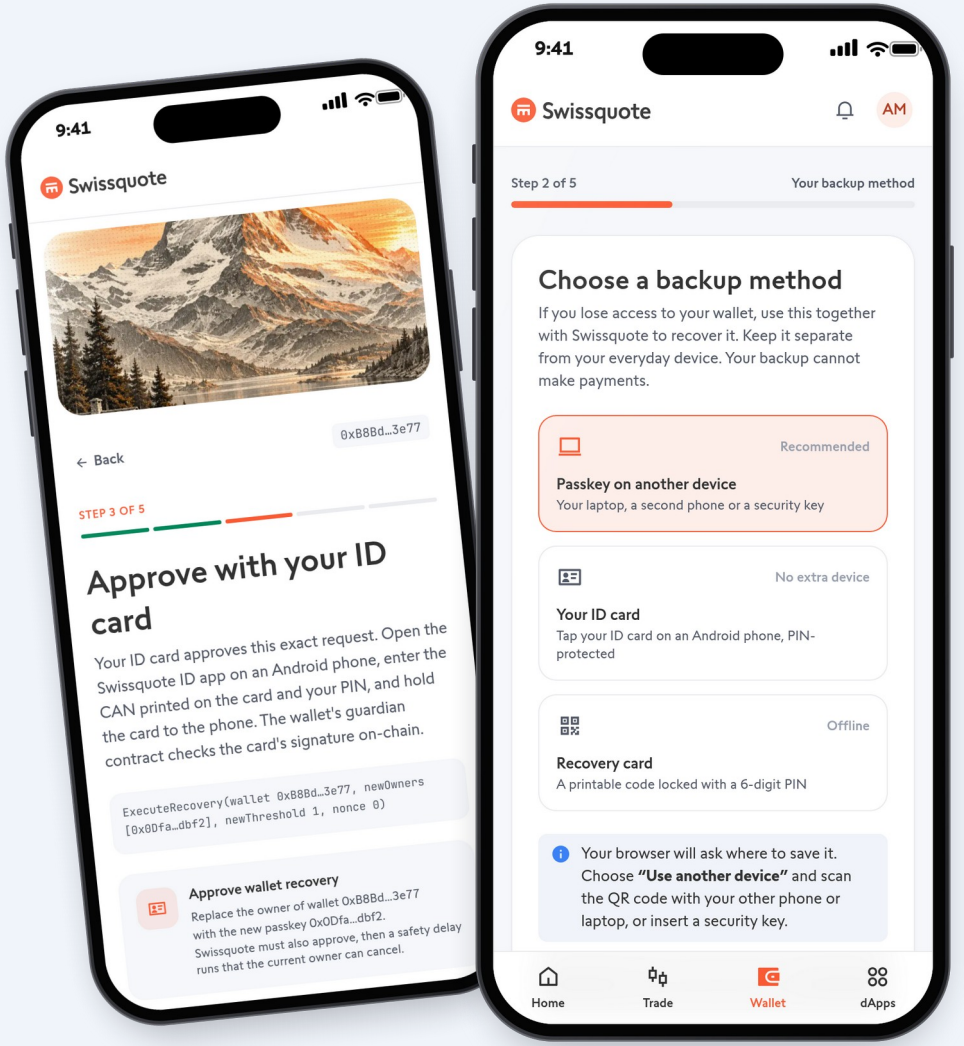

GUARDIAN B: YOUR CHOICE OF THREE

ID card
Tap it on an Android phone, PIN-protected

Recovery passphrase
Printable, locked with a PIN, offline

Another passkey
Laptop, 2nd phone or a trusted person

Only for recovery. Payments need your passkey alone.

Swissquote

IS SWISSQUOTE THE SENDING INSTITUTION? NO

Account	→	Your wallet	Ownership already proven
Your wallet	→	Account	Same proof
Your wallet	→	Anyone	You send. Swissquote is not a party

The wallet signs its own ownership proof, checked on-chain and archived (FINMA Guidance 02/2019).

Swissquote

THE TECHNICAL CALLS

Recovery in the first transaction

No funded wallet without recovery

Vendor-signed face check

A hacked backend can't fake it

Guardians as separate services

Own project, own database

Base Sepolia

P-256 precompile: cheap passkey checks

Safe + Candide modules

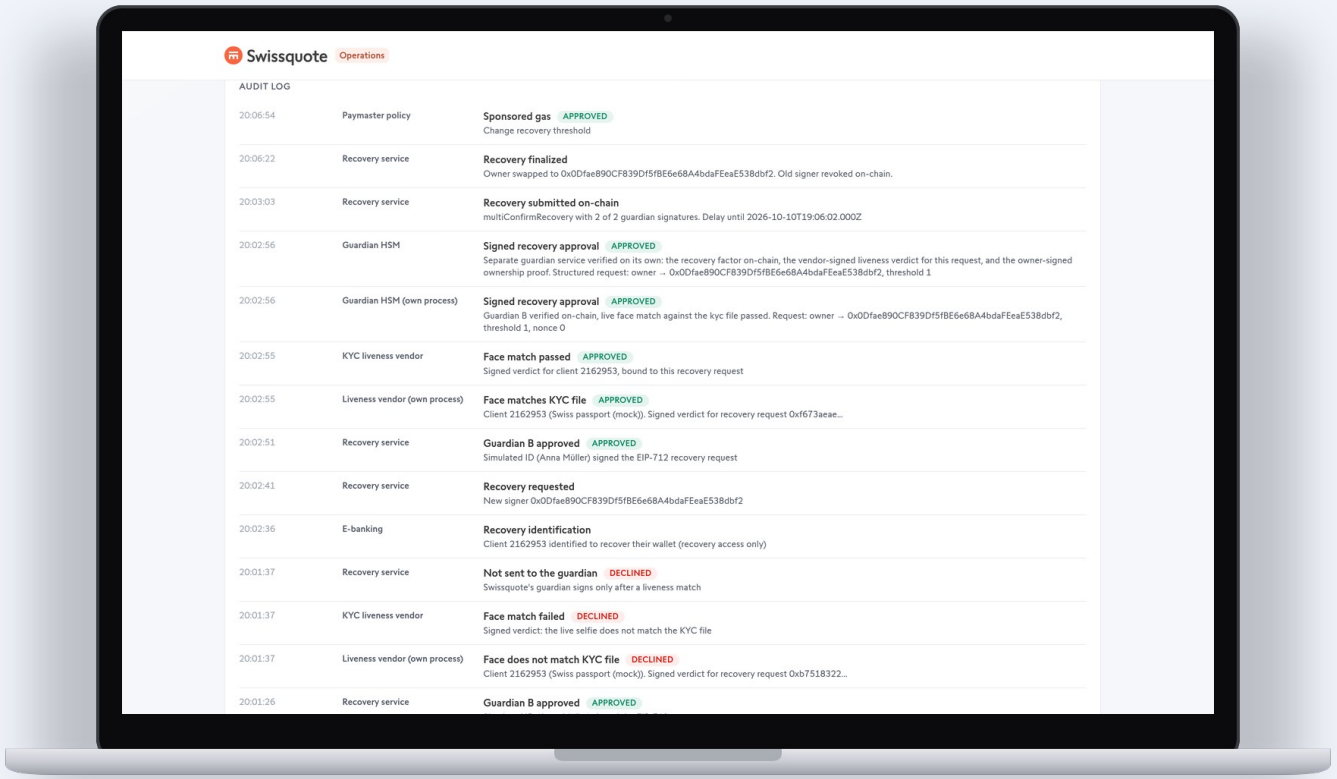

Audited, no homemade crypto

Web app, not native

Passkeys follow you across devices

Swissquote

HONEST MOCKS. TESTED END TO END

REAL

Passkeys, verified on-chain

Safe, ERC-4337, recovery module

Gas sponsorship, USDC

MOCK

Login, face analysis, HSMs

Sanctions list, fiat funding

TESTED

Create, sign, recover in a real browser

Forged face verdicts, attackers

Swissquote

WHICH AI TOOLS WE USED, AND FOR WHAT

Claude Code

Pair-programmed the app, contracts, ID app and tests

Codex and Claude

Two adversarial reviews of our plan

Us

Custody decisions, on-chain checks, legal framing

Swissquote

WHAT WE WOULD DO NEXT

LIMIT	NEXT
Thief with phone and PIN	On-chain delay for large transfers
Synced passkeys trust Apple, Google	Security keys for big balances
ID card: simulated, Android only	Real-card test, iOS, rescue page
Software keys, public paymaster	HSMs, private paymaster, rate limits
Legal reasoning, not an opinion	Counsel and a FINMA conversation
