Swissquote

YOUR KEYS.
YOUR CONTROL.

The wallet Swissquote can recover,
but never spend.

swissquote-two.vercel.app

Swissquote

SELF-CUSTODY TODAY MEANS LEAVING SWISSQUOTE

Custodial

Not your keys

External wallet

24 words on paper.
Lose them, lose it all

Our wallet

Your keys, one tap from Swissquote

Lose

Recover

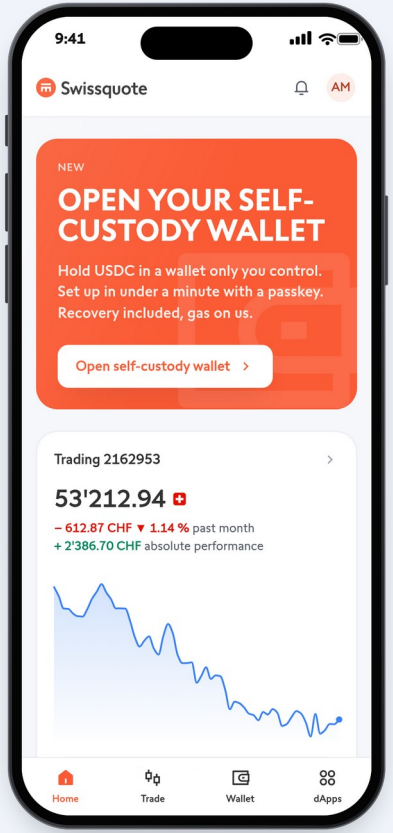

Real transactions on Base Sepolia. Backup screens follow if the network misbehaves.

DEMO BACKUP · CREATE

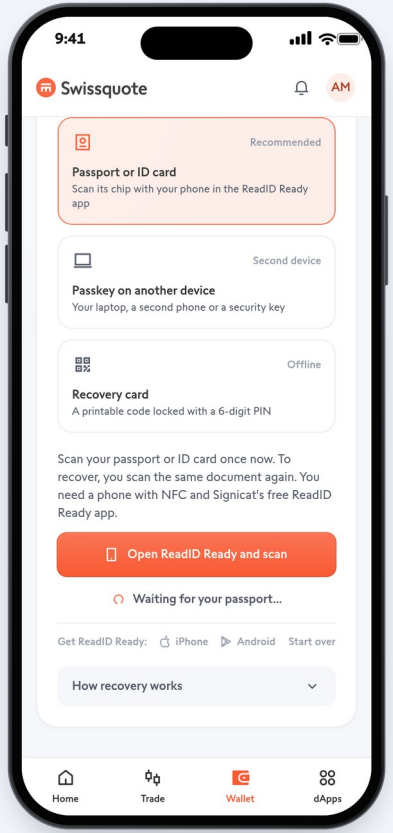

Swissquote

ONE TAP. RECOVERY BUILT IN

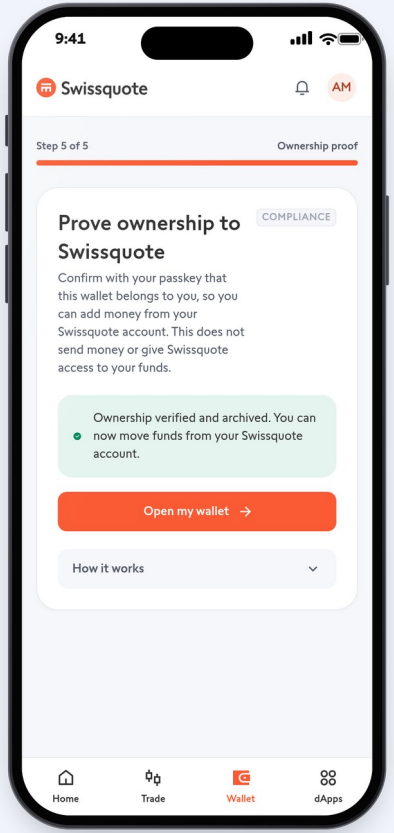

1 Open from e-banking

2 Scan your passport

3 Ownership proven

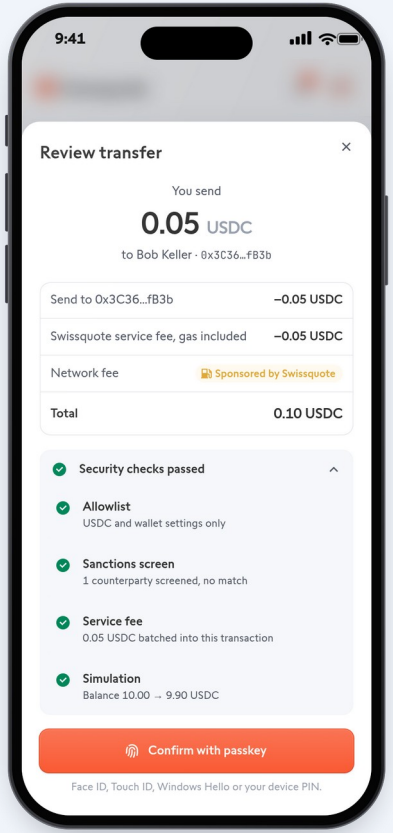

DEMO BACKUP · SIGN

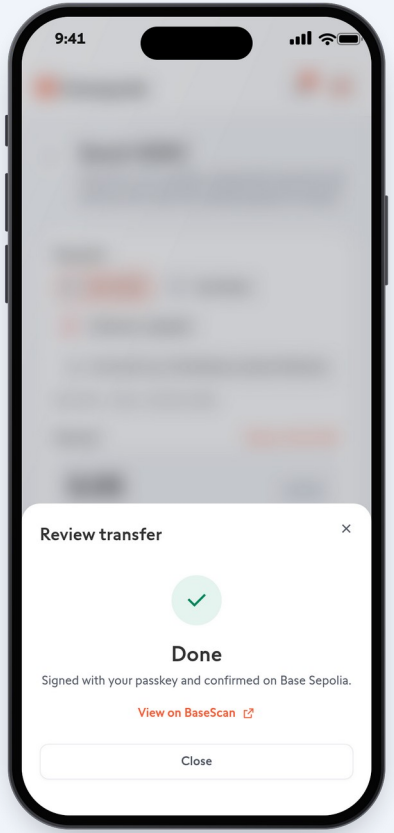

Swissquote

YOUR PASSKEY APPROVES. SWISSQUOTE PAYS THE GAS

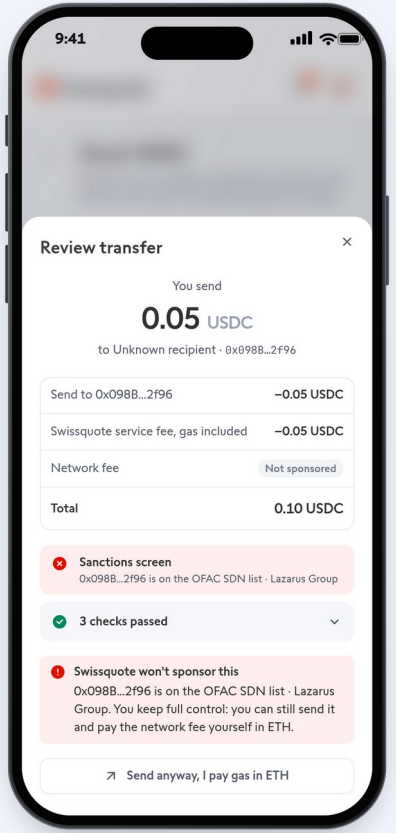

1 Checked, gas sponsored

2 Approved with your passkey

3 Sanctioned: declined

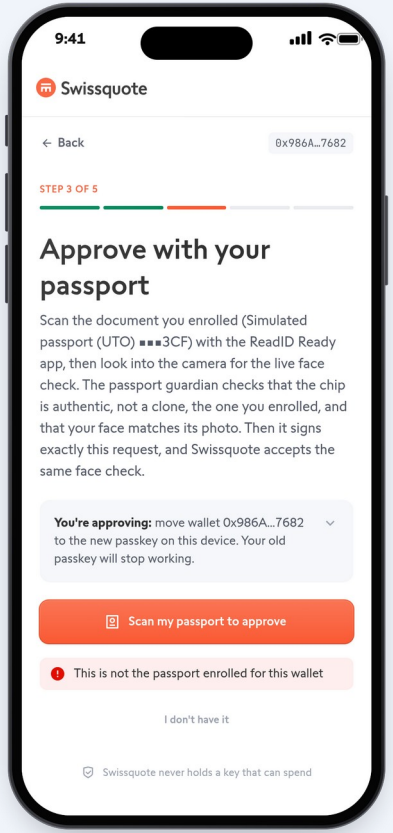

DEMO BACKUP · ATTACK

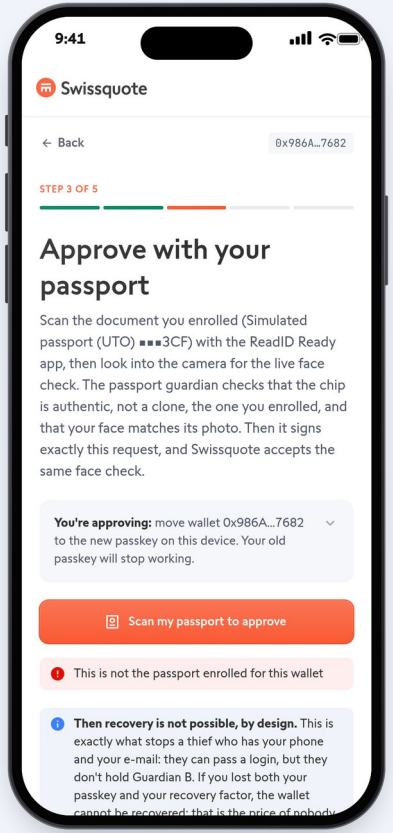

Swissquote

THE THIEF GETS NOTHING

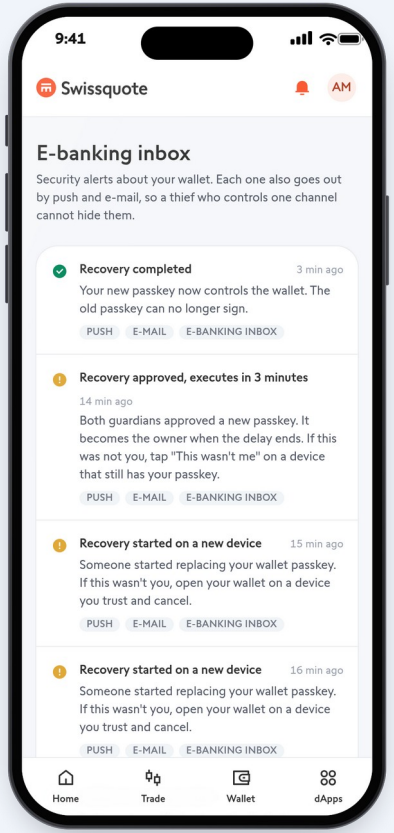

1 Wrong passport: refused

2 No passport: no recovery

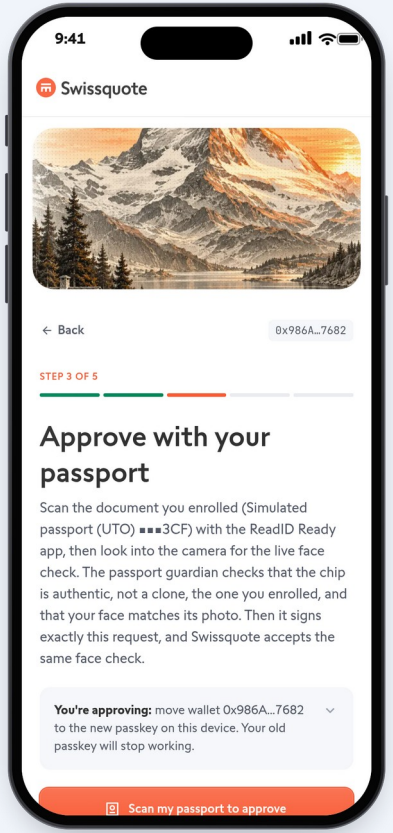

3 Owner alerted

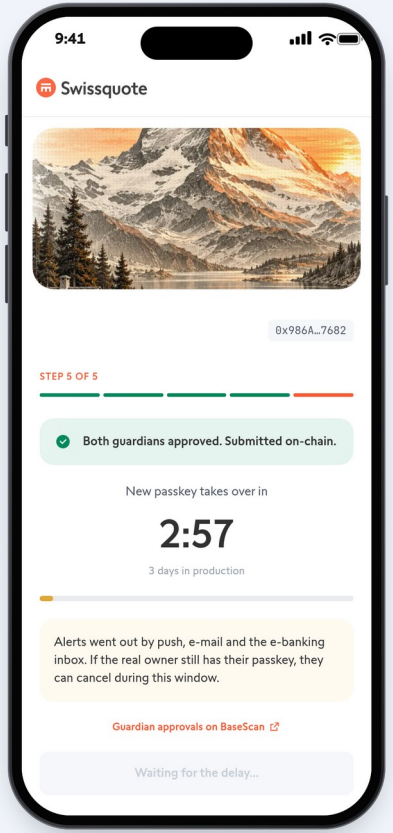

Swissquote

RECOVER WITH YOUR PASSPORT

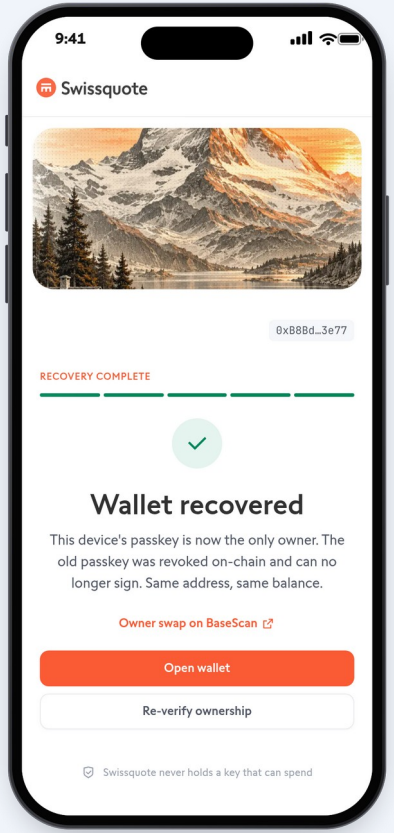

1 Scan the same passport

2 Both approved, 3-day wait

3 Recovered

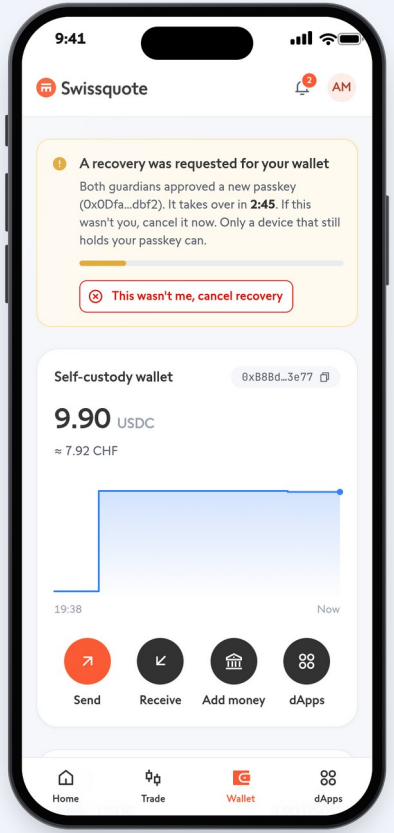

DEMO BACKUP · SAFETY NET

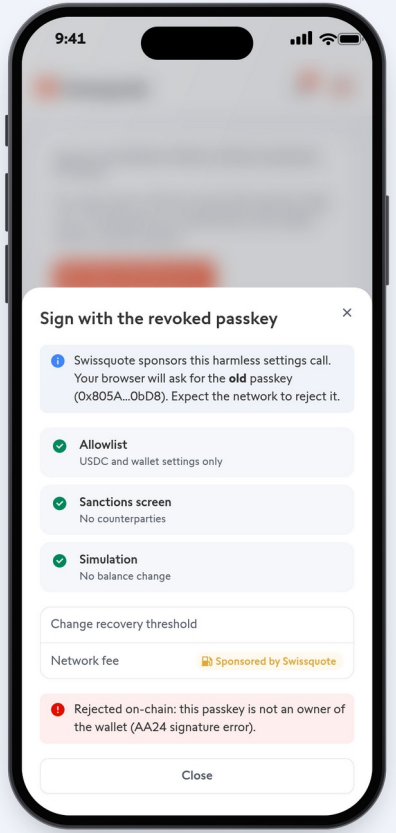

Swissquote

YOU CAN STOP IT. THE OLD KEY IS DEAD

1 Cancel with one tap

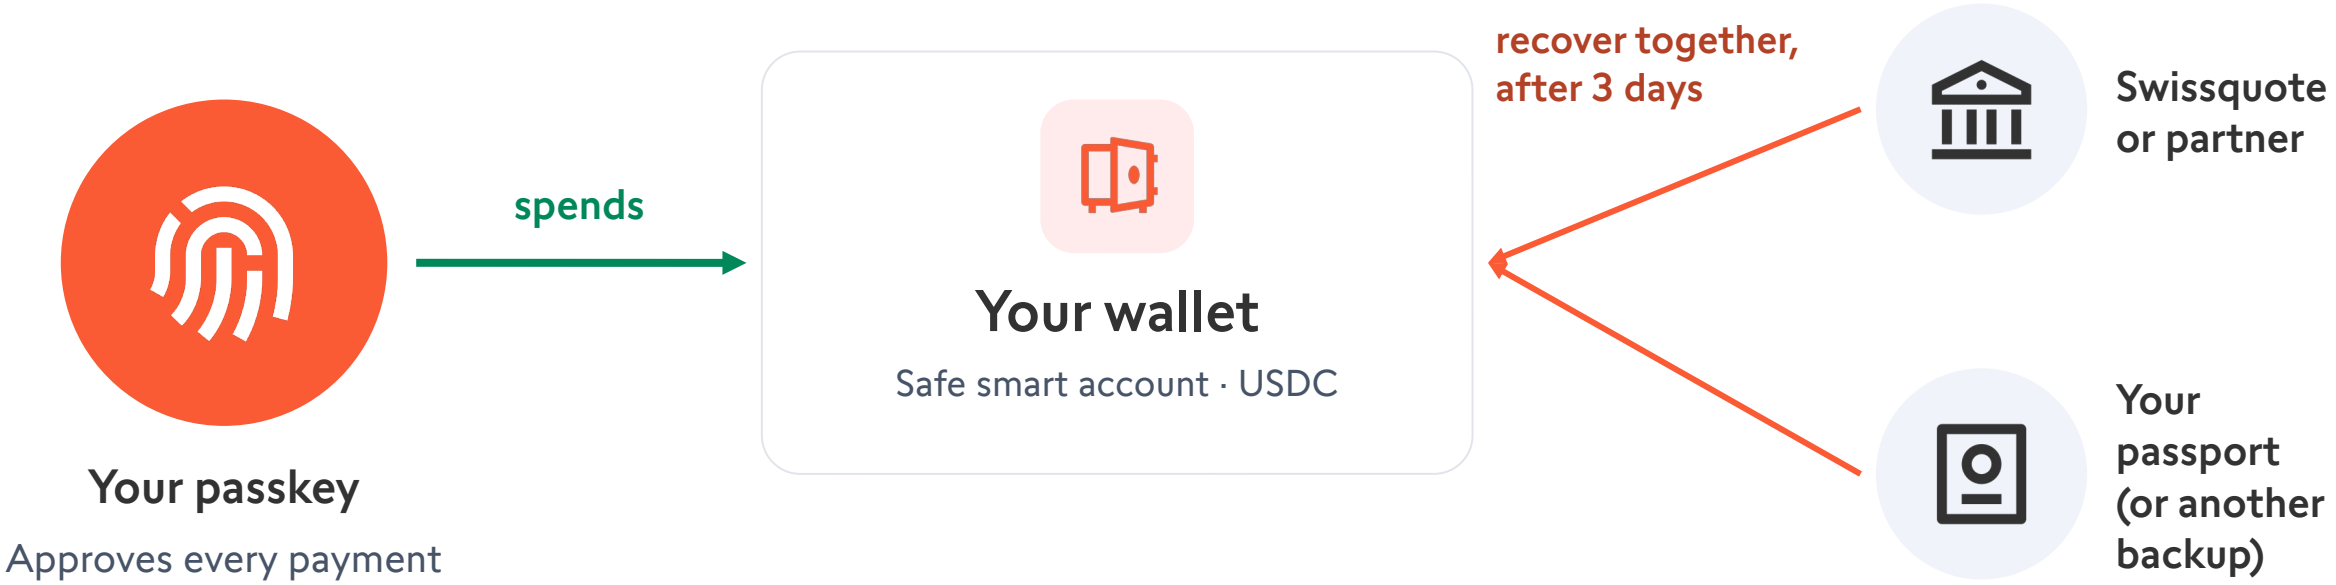

2 Old passkey rejected

Swissquote

ONLY YOUR PASSKEY CAN SPEND

Swissquote can help you recover

Swissquote can never spend

Swissquote

NOBODY ELSE CAN MOVE THE FUNDS

	STEAL	TAKE OVER	LOCK YOU OUT
You	✓	✓	—
Swissquote, even if hacked	✗	✗	✗
Swissquote + partner	✗	✗	✗
Insider + your stolen passport	✗	⏱	✗
Thief with phone + e-mail	✗	✗	✗
Swissquote disappears	✗	✗	✗
You lose phone and passport	—	—	!

Clock: only after a 3-day delay you can cancel. Warning: nobody can recover for you, by design.

Swissquote

WHAT WE GAIN, WHAT WE GIVE UP

PROS

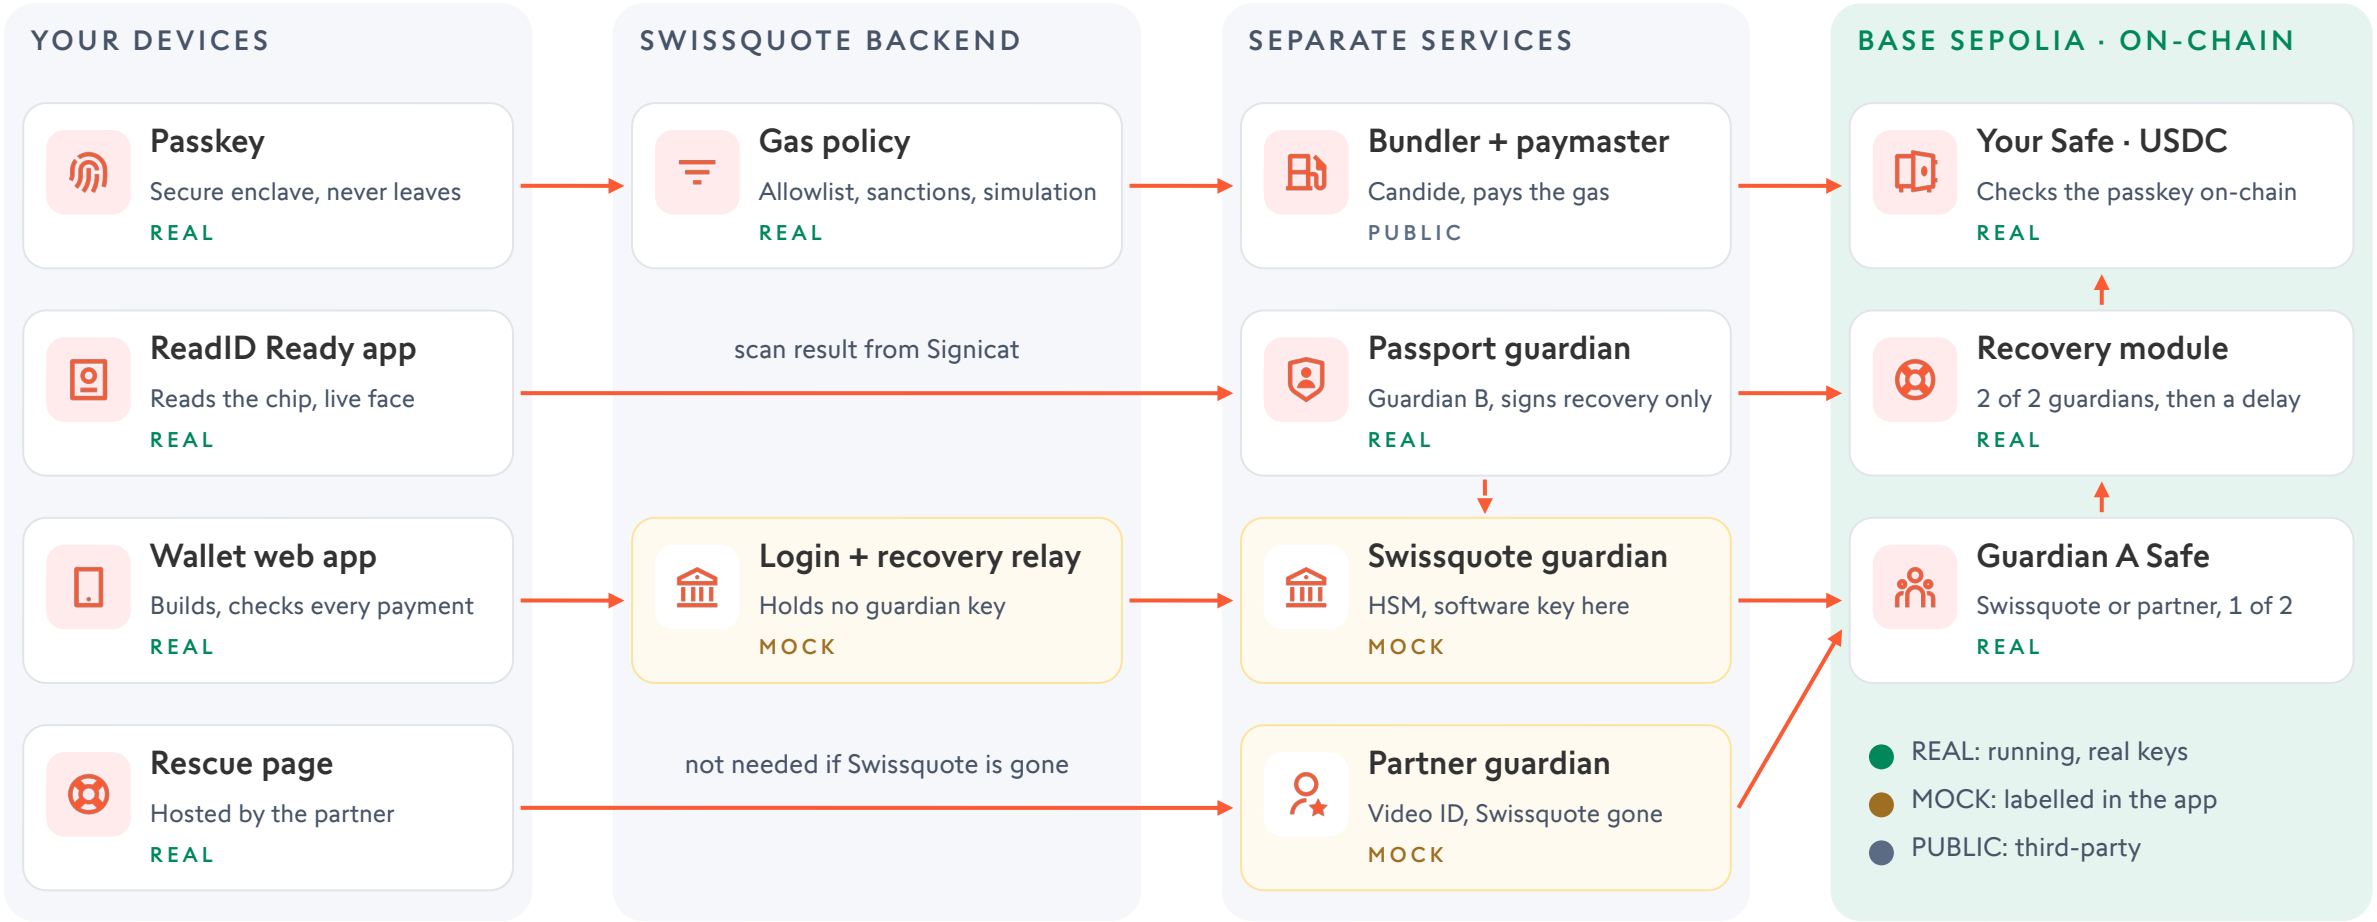

- ✓ **Only you can spend**
  Software, not custody
- ✓ **No seed phrase**
  Your passport is the backup
- ✓ **Survives Swissquote**
  Partner + public rescue page
- ✓ **Audited building blocks**
  Safe, Candide, WebAuthn

CONS

- ✗ **EVM chains only**
  Bitcoin needs its own vault
- ✗ **Lose passkey and passport**
  Locked out, by design
- ✗ **Thief with phone + its PIN**
  Acts as the owner
- ✗ **Recovery takes 3 days**
  The price of being able to cancel

ARCHITECTURE

WHAT TALKS TO WHAT

Swissquote

YOUR KEYS ARE BORN ON YOUR PHONE

1

Log in to e-banking

Wallet tied to your KYC file

2

Create a passkey

Made in the secure enclave, never leaves

3

Scan your passport

Your backup for recovery

4

One transaction

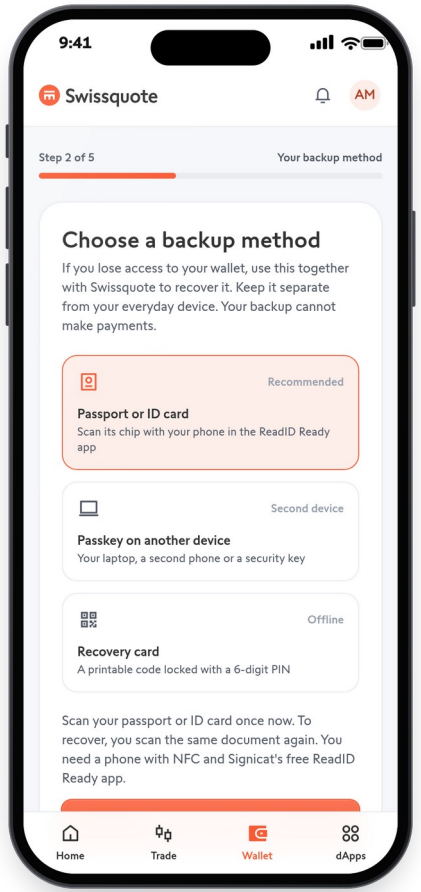

Wallet, recovery, guardians, ownership proof

BEFORE EVERY PAYMENT

Unlock your phone
Face ID, fingerprint or PIN

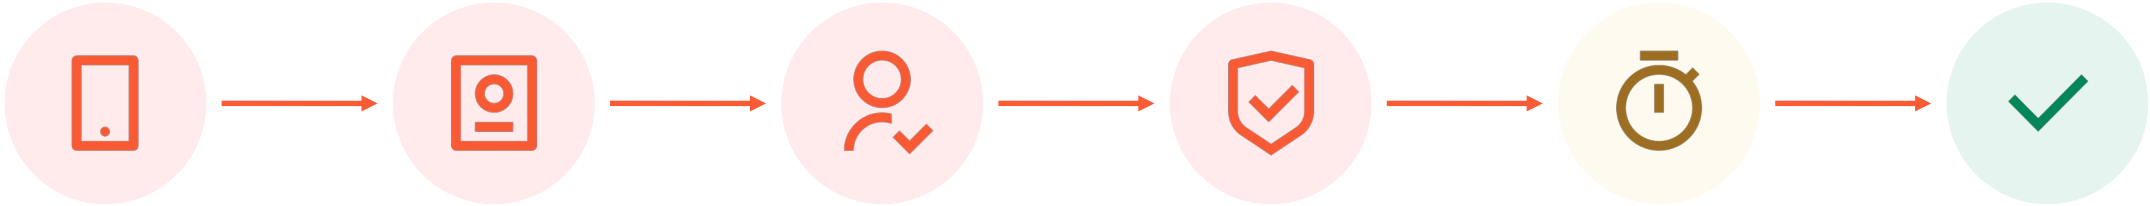

Passkey signs
Only on this device

Safe checks it
On-chain, every amount

Swissquote

RECOVER WITH YOUR PASSPORT

New phone
Log in, new passkey

Scan passport
Chip genuine, not cloned

Live face check
Your face matches the chip

Two approvals
Passport guardian + Swissquote

3-day wait
Alerts. One tap to cancel

Same wallet
New passkey owns it

One scan: it approves as your backup and as Swissquote's face check

Thief with your phone and e-mail
No passport to scan. Someone else's is refused. Yours, stolen, fails the live face check.

You + passport guardian + Swissquote
About 5 minutes of your time, then 3 days. If Swissquote is gone, the partner signs instead.

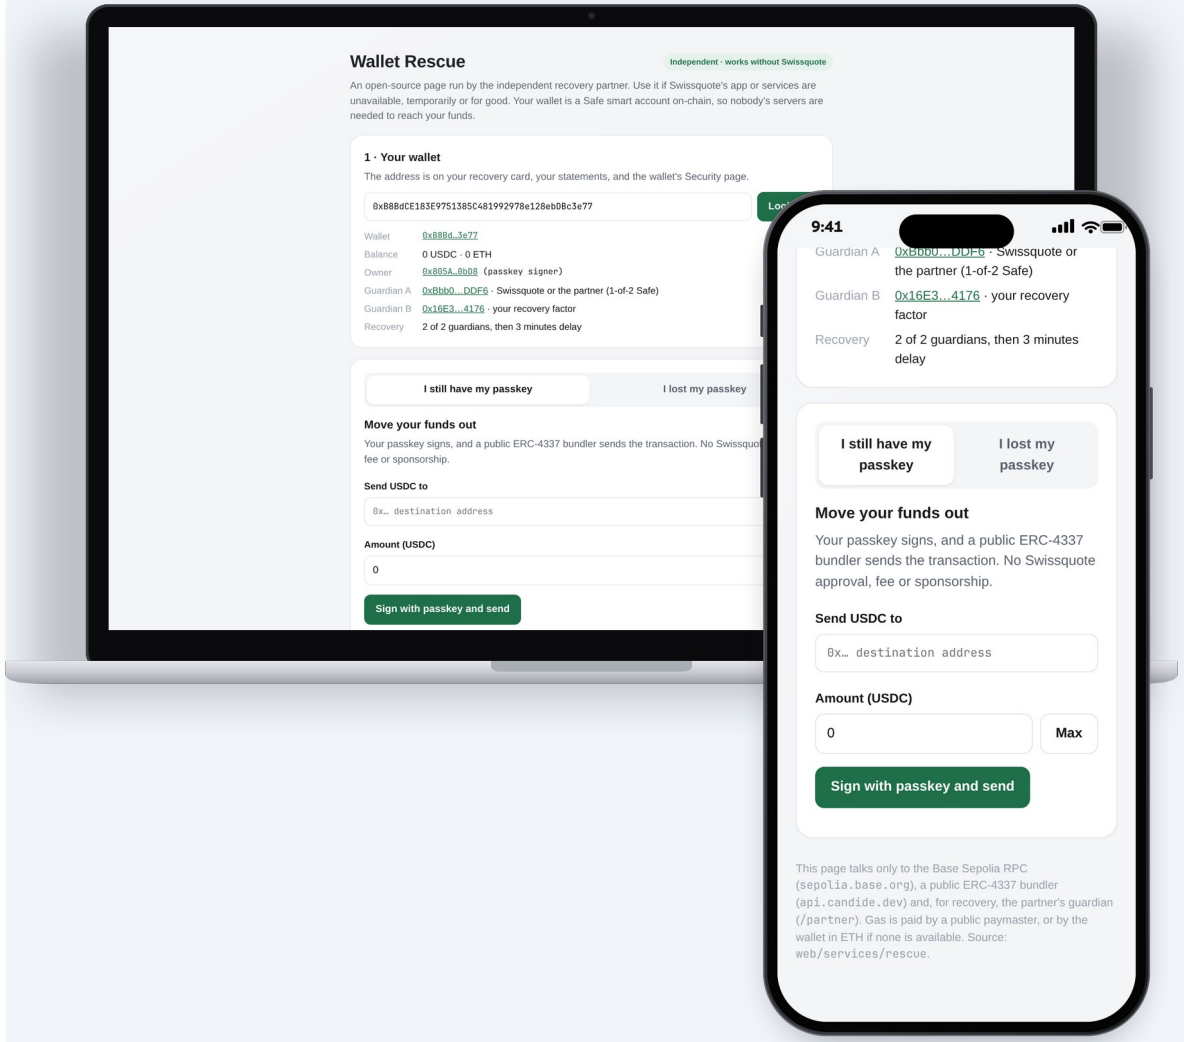

EXIT PATH

IF SWISSQUOTE DISAPPEARS, THE MONEY DOESN'T

Still have your passkey?
Send it out yourself

Lost it too?
Your passport + the partner

No Swissquote server
Public RPC and bundler

Swissquote

WHY WE BUILT IT THIS WAY

Passkey wallet

not MPC with a bank share

A bank key share would make it custody

Swissquote as guardian

not as co-signer

It can help recover, never spend

Two approvals, then a delay

not instant recovery

No one party alone; insiders get caught

Decline gas, never block

not a transaction filter

Blocking would be power of disposal

Passport as the backup

not a seed phrase

Everyone has one. Chip + live face

Partner beside Swissquote

not Swissquote alone

Recovery survives Swissquote disappearing

BONUS · GASLESS AND COMPLIANT DAPPS

SWISSQUOTE PAYS GAS. IT DECLINES, NEVER BLOCKS

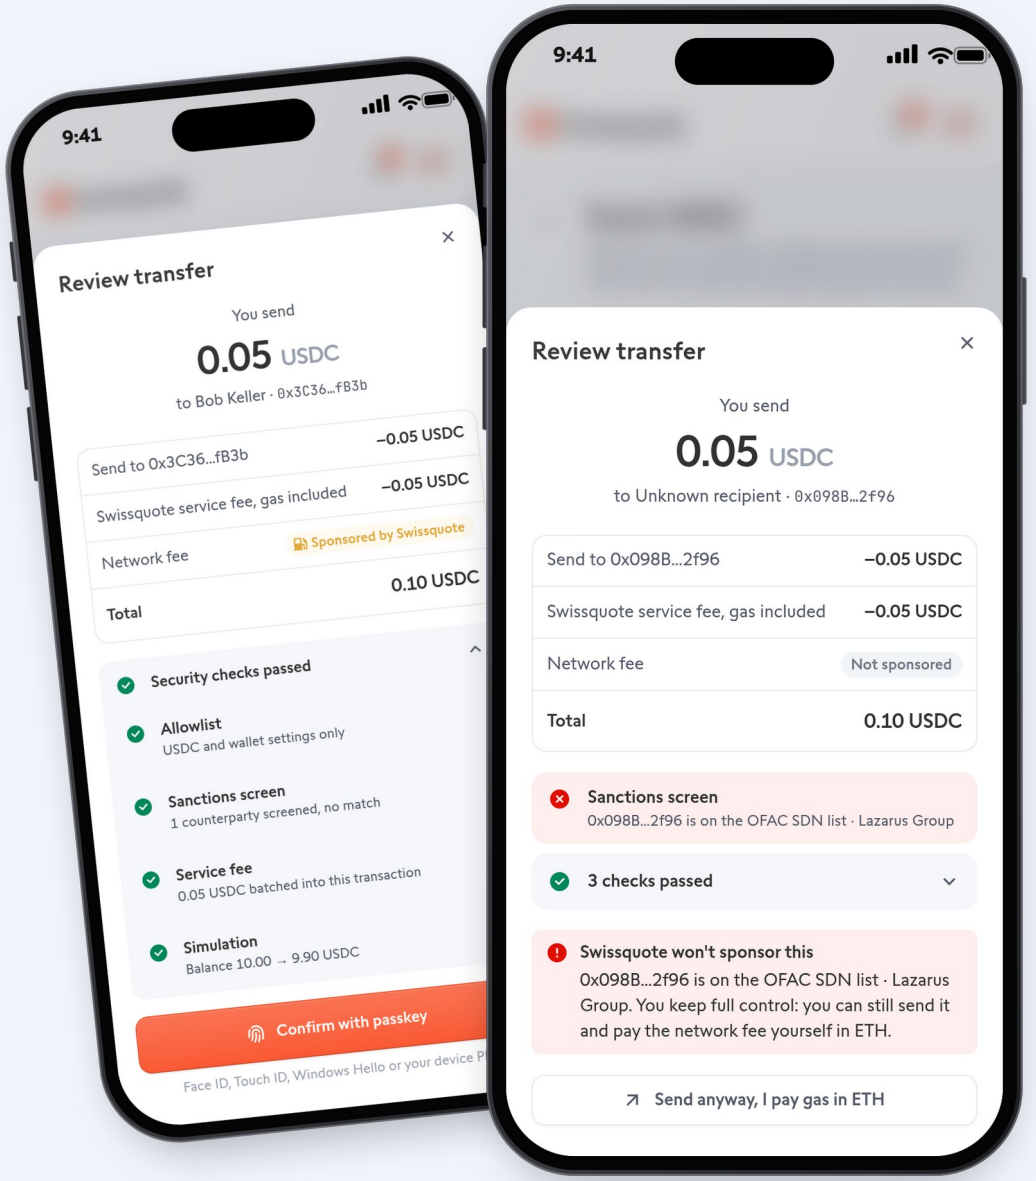

0 ETH

needed. Swissquote pays the gas,
0.05 USDC fee in the same transaction.

Sanctioned or drainer?
Swissquote declines to pay

Never blocked
Send anyway, pay your own gas

Swissquote

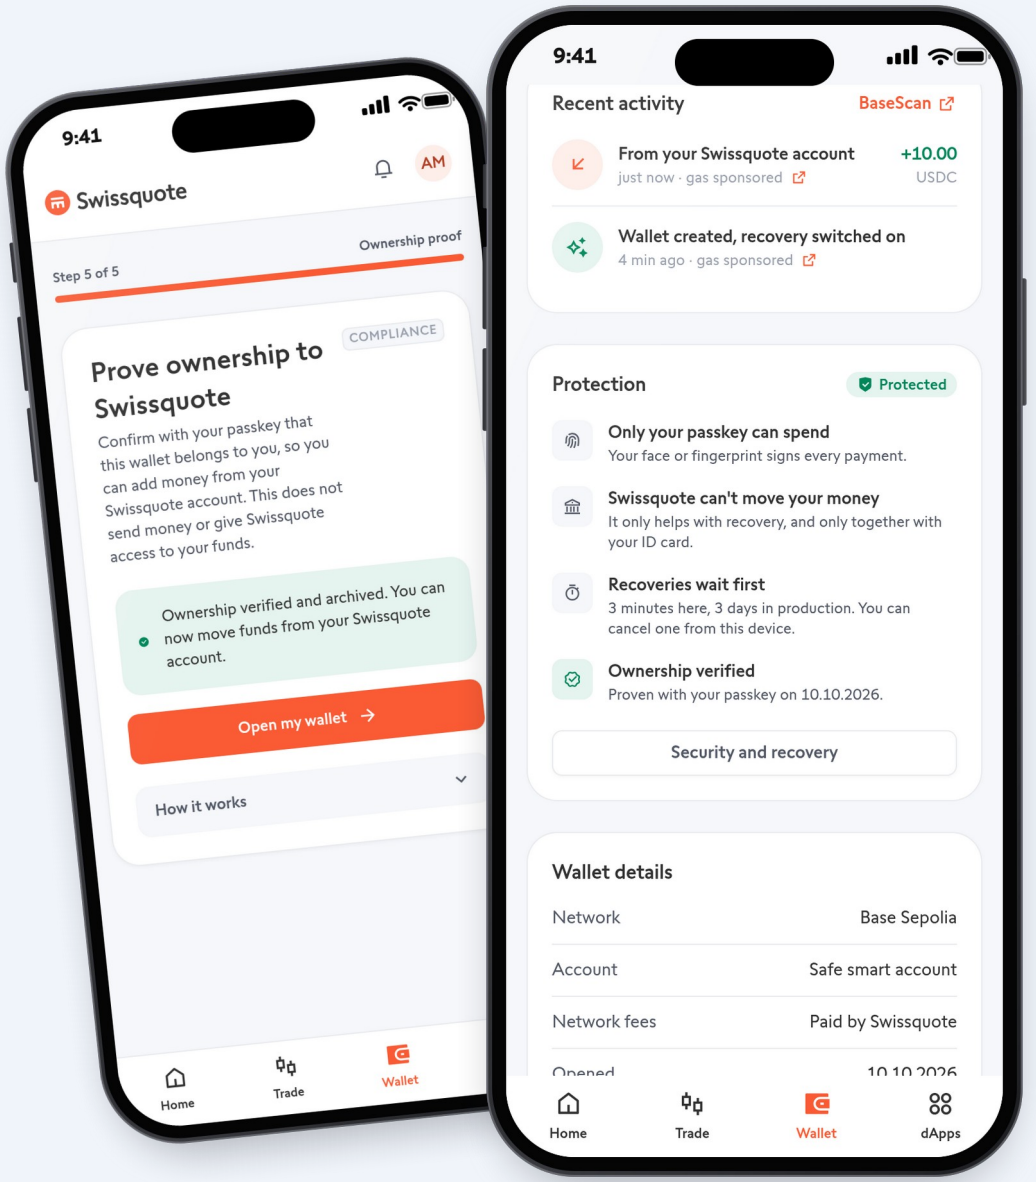

LEGAL FEASIBILITY

SOFTWARE, NOT CUSTODY

- **Swissquote can't sign**
- **Can't recover alone**
  Not even with the partner
- **Can't block a payment**
- **Travel Rule**
  Ownership proven automatically

Simplified reasoning, not legal advice.

Swissquote

Swissquote

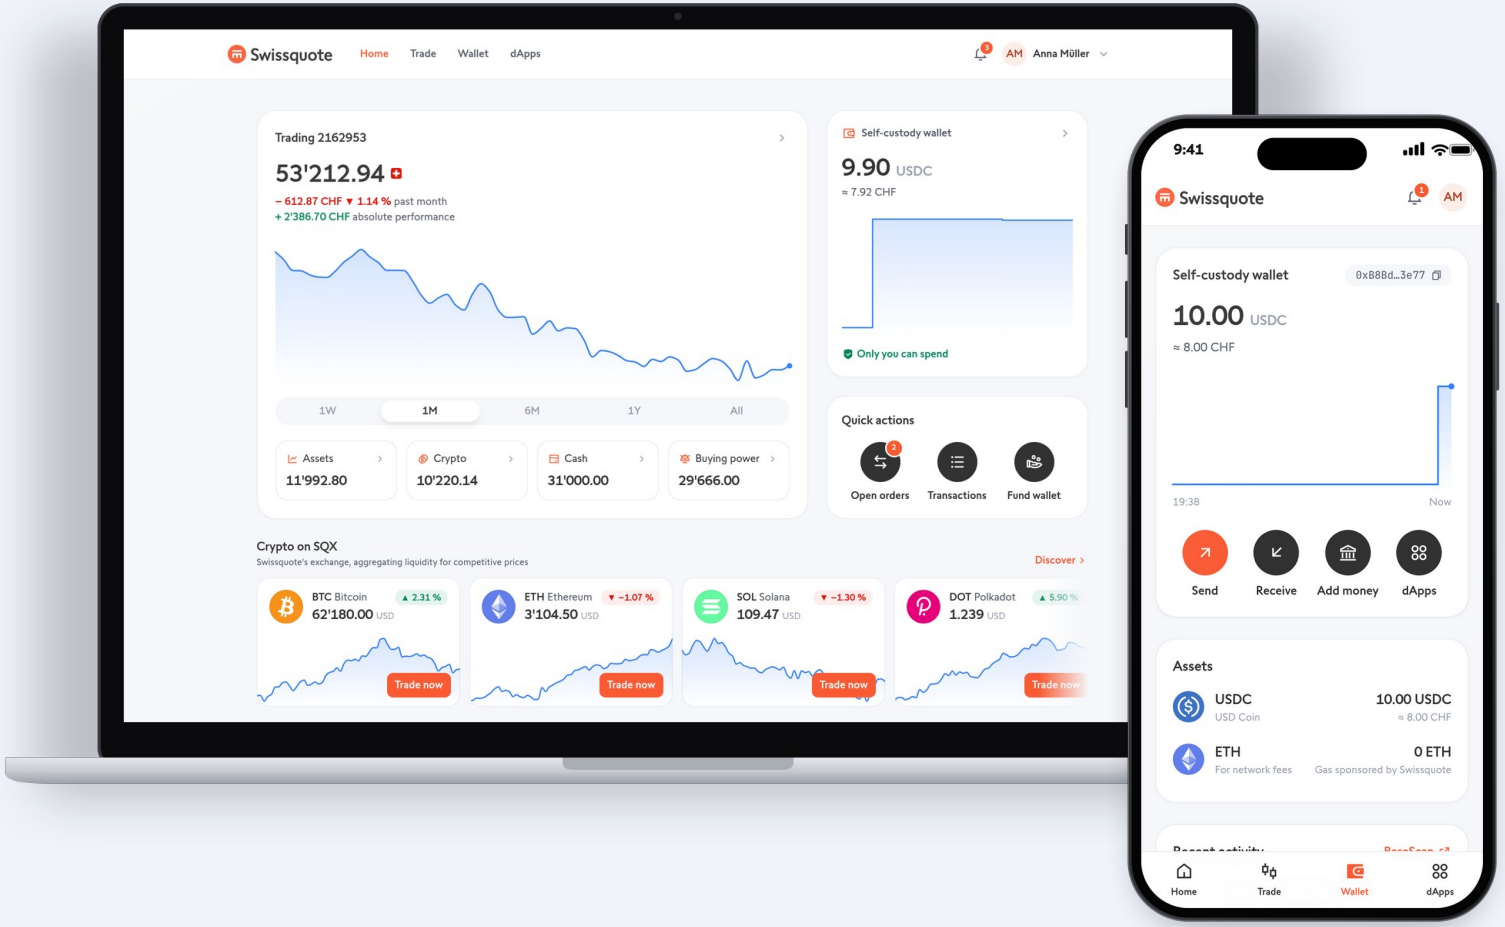

KEEP THE ASSETS. EARN ON ACTIVITY

Retention
Withdrawals stay next to trading

Fees
0.05 USDC per transfer

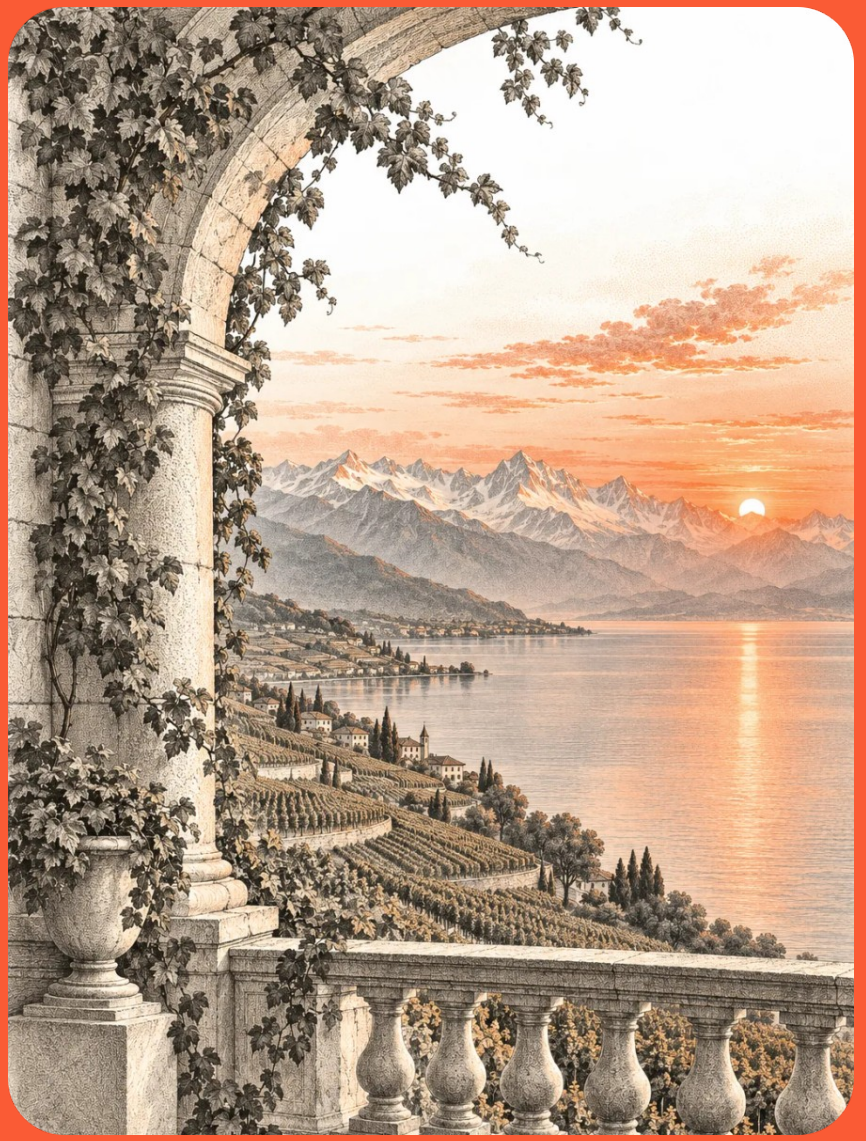

Trading
One tap back to SQX

Lower cost
No manual wallet checks

Swissquote

THE WALLET SWISSQUOTE CAN RECOVER, BUT NEVER SPEND.

swissquote-two.vercel.app

Questions welcome

Swissquote

WHO COULD STEAL, WHO COULD LOCK YOU OUT

Stolen phone

Passkey needs unlock

Phone + e-mail

No passport, no face

Swissquote hacked

Holds no spending key

Swissquote + partner

Only one guardian vote

Stolen passport

Face must match, then you cancel

Swissquote gone

Rescue page + partner

Phone + its PIN

Residual: owner-level access

You lose everything

Locked out, by design

Swissquote

WHY NOT SEED PHRASE, MPC OR SHAMIR

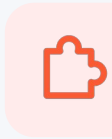

Seed phrase

Lose the paper, lose the funds

MPC, bank share

Bank co-signs everything: custody

Shamir split

Key rebuilt in one place

Passkey Safe

Key replaced, never rebuilt

EVM-only? What about Bitcoin? Wrapped BTC sits in the same Safe today. Native BTC next: a Taproot vault, your key spends, guardians only after a timelock.

Swissquote

TWO KEYS REPLACE THE OWNER. YOU ALWAYS HOLD ONE

GUARDIAN A

Swissquote or partner
After a signed live face check

+

GUARDIAN B

Your passport
Or another passkey, or a recovery card

→

3-day delay
Alerts. One tap to cancel

New passkey owns it
Same address. Old key dead

About 5 minutes of client effort, then the delay. Never one party alone.

Swissquote

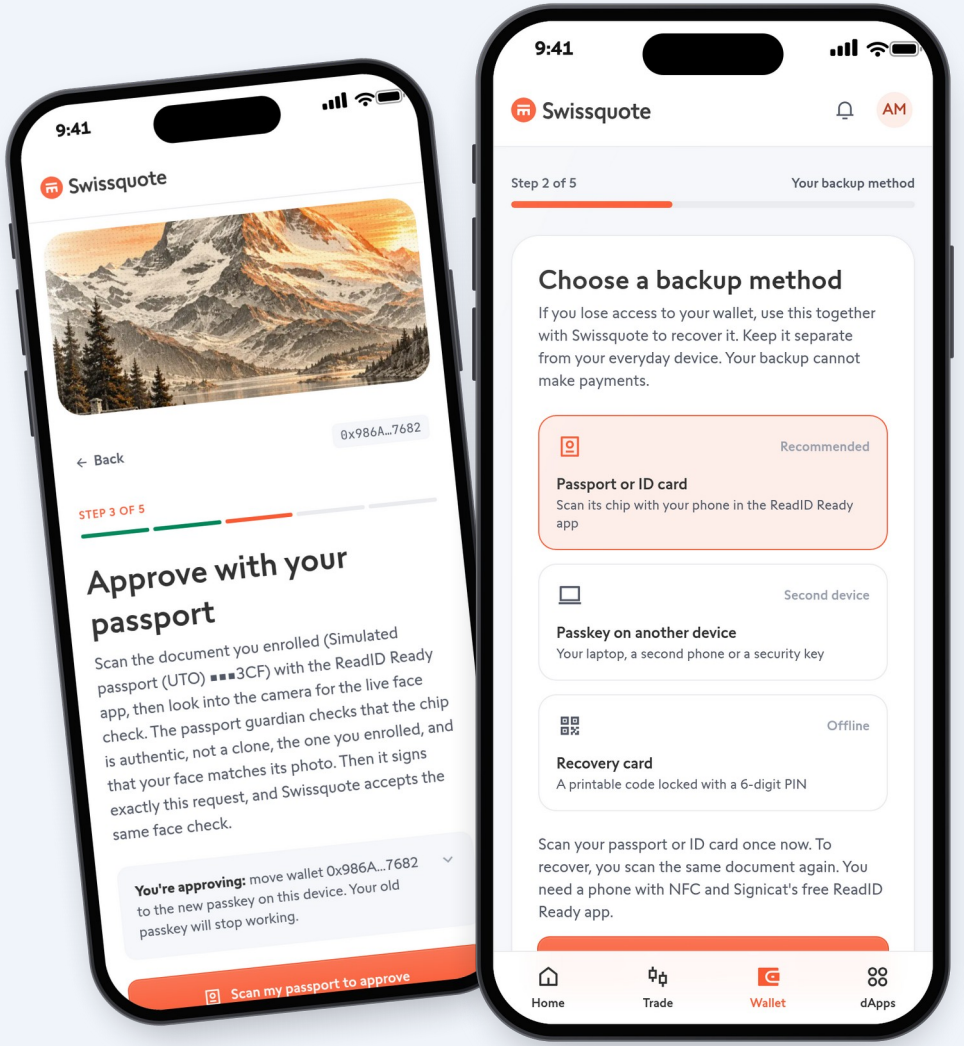

GUARDIAN B: YOUR CHOICE OF THREE

Passport or ID card
Scan the chip in ReadID Ready, plus a live face check

Another passkey
Laptop, 2nd phone, security key or a trusted person

Recovery card
Printable code, locked with a PIN, offline

Only for recovery. Payments need your passkey.

Swissquote

IS SWISSQUOTE THE SENDING INSTITUTION? NO

Account	→	Your wallet	Ownership already proven
Your wallet	→	Account	Same proof
Your wallet	→	Anyone	You send. Swissquote is not a party

The wallet signs its own ownership proof, checked on-chain and archived (FINMA Guidance 02/2019).

Swissquote

THE TECHNICAL CALLS

Recovery from day one

No funded wallet without recovery

Signed face checks

A hacked backend can't fake them

Separate guardians

Own project, own database

Passport guardian

A chip can't sign our request

ReadID Ready

No app of our own. iPhone and Android

Base Sepolia

P-256 precompile: cheap passkey checks

Safe + Candide

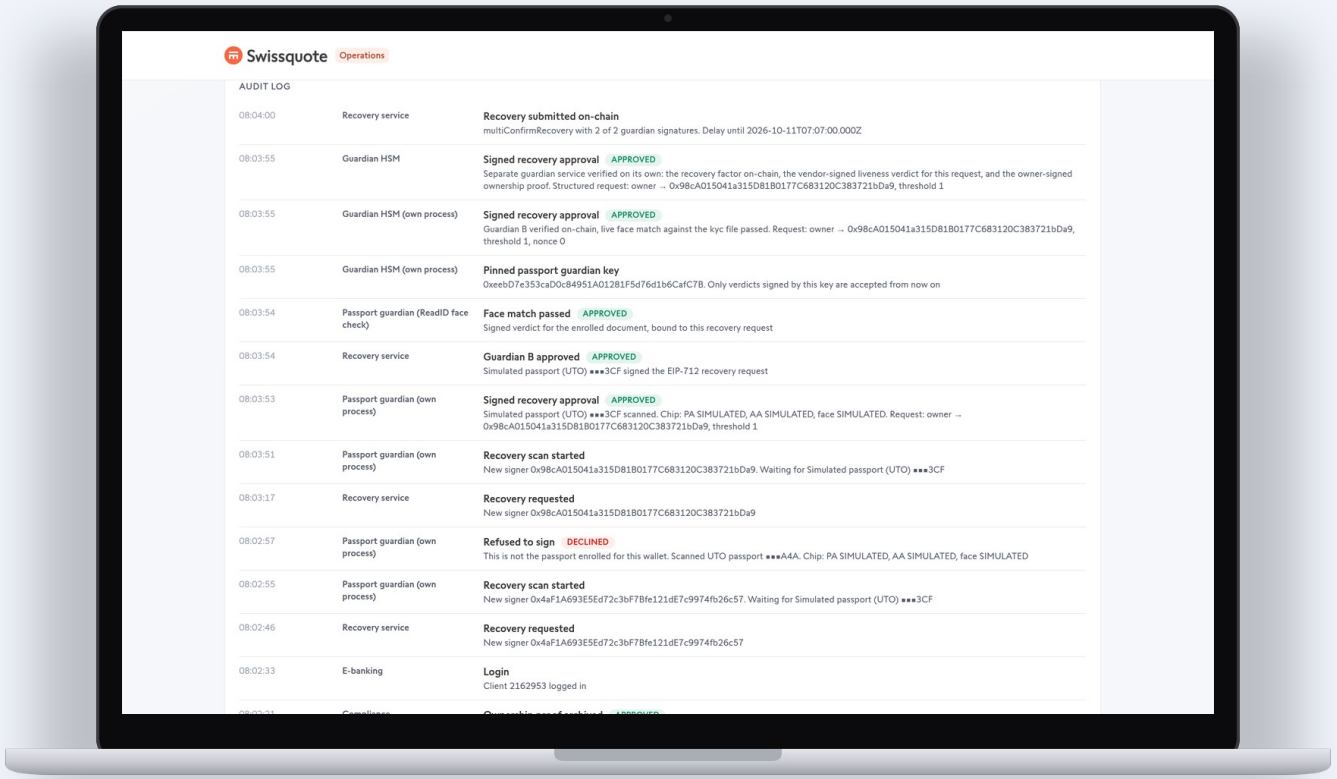

Audited, no homemade crypto

Web app, not native

Passkeys follow you across devices

Swissquote

HONEST MOCKS. TESTED END TO END

REAL

Passkeys, verified on-chain

Safe, ERC-4337, recovery module

Passport scan: ReadID, iProov

Gas sponsorship, USDC

MOCK

Login, HSMs, partner video ID

Sanctions list, fiat funding

TESTED

Create, sign, recover in a real browser

Wrong passport, forged verdicts

Swissquote

WHICH AI TOOLS WE USED, AND FOR WHAT

Claude Code

Pair-programmed the app, guardian services and tests

Codex and Claude

Two adversarial reviews of our plan

Us

Custody decisions, on-chain checks, legal framing

Swissquote

WHAT WE WOULD DO NEXT

LIMIT	NEXT
Thief with phone and PIN	→ On-chain delay for large transfers
Synced passkeys trust Apple, Google	→ Security keys for big balances
New passport, new enrolment	→ Prompt before it expires
Software keys, public paymaster	→ HSMs, private paymaster, rate limits
Legal reasoning, not an opinion	→ Counsel and a FINMA conversation
